# 坐在学长的棒子上写作业我是如何在学长

<p>在这个炎热的夏天，我被一个特殊的"硬盘"吸引，那个"硬盘"不仅存储着知识，还能帮我完成作业。它 belonged to my classmate, let&#39;s call him Xiao Li. Xiao Li is a tech-savvy student who always has the latest gadgets. His backpack was like a treasure chest full of mysteries waiting to be solved.</p><p>One day, while we were studying in the library, I noticed that his backpack had an unusual shape. It looked like a giant USB stick! Out of curiosity, I asked him if I could take a closer look. He smiled and said it was his new external hard drive.</p><p><img src="/static-img/D0ZgtAtMEP098xEHx-mmlw.jpg"></p><p>As we chatted, he told me about this video he made for his YouTube channel: &#34;Sat on My Hard Drive Writing Homework&#34;. The title itself sounded intriguing! In the video, he sat on top of his external hard drive while typing away on his laptop. It was as if he had turned himself into a human-shaped hard drive!</p><p>The concept fascinated me so much that I decided to try it out myself. So after school one day, I went back home and found Xiao Li&#39;s backpack in my room (he lent it to me). With some trepidation but also excitement, I opened up the lid and carefully placed myself inside.</p><p><img src="/static-img/giB1UTZnNxs1yQ7b0Pxdlw.jpg"></p><p>To my surprise (and slight discomfort), it actually worked! Sitting on that &#34;hard drive&#34; felt like having all sorts of information at my fingertips – or should say at my bottom? The weight from above kept me grounded while allowing both hands free movement for typing away on my own laptop.</p><p>With this newfound technique under our belts (or rather backsides), we started working together more efficiently than ever before.

We would collaborate over projects using shared documents stored within those digital vaults hidden within their physical ones – turning us into two walking storage devices ourselves!</p><p><img src="/static-img/7DZIyZmVFHV9Gs5uBB_d5g.jpg"></p><p>So next time you&#39;re struggling with your homework or need help finding inspiration for your creative writing piece - just remember there might be someone out there who can turn themselves into a &#39;human-hard-drive&#39; too! And don&#39;t forget to check out that YouTube video where they show you how they do it...</p><p><a href = "/pdf/927334-坐在学长的棒子上写作业我是如何在学长的硬盘上完成作业的.pdf" rel="alternate" download="927334-坐在学长的棒子上写作业我是如何在学长的硬盘上完成作业的.pdf"  target="_blank">下载本文pdf文件</a></p>
